

Mathematics Colloquium

Moving forward and expending your Research

Hani Michel Samawi, Ph.D.

Georgia Southern University
Jiann-Ping Hsu College of Public Health

Abstract: All research areas that serve humanity are worth exploring. Focusing on real life applications to solve or create new statistical procedures as needed is essential for moving forward in research and building better communities. Finally, collaboration with other faculties, students and community members and working as a team is important to advance your areas of research and improve your community.

Room: EMAGC 1.302 and via WebEX to BBRHB 1.207

Date: Tuesday, March 21, 2017
