

Mathematics Colloquium

Build it while you fly it: Teaching and Community Outreach Philosophy

Hani Michel Samawi, Ph.D.

Georgia Southern University
Jiann-Ping Hsu College of Public Health

Abstract: Teaching is like preaching, you want to use all of your knowledge and all of your available talent, experience and tools to make the students not only understand the material you are presenting, but also to believe in the usefulness of learning the material.

My future plans for teaching involves expanding into more technologically enhanced delivery of courses and programs, becoming more involved in faculty mentoring with regards to teaching, and creating more reliable instruments for student learning assessments and for teaching assessments.

Being a good citizen is a key of serving communities. It is important for educators to get involve more in community serves and making a partnership to achieve the vision and goals of the SMSS.

Room: BMAIN 2.112 and via WebEX to EMAGC 1.302

Date: Wednesday, March 22, 2017
