

TEXAS ADVANCED COMPUTING CENTER

The Texas Advanced Computing Center (TACC) designs and operates some of the world's most powerful computing resources. The center's mission is to enable discoveries that advance science and society through the application of advanced computing technologies.

## HOW CAN TACC HELP?

- Provide computational tools and expertise needed to address modern biological research questions.
- Consult with you on the application of TACC's computational systems to help accelerate the pace of discovery.
- Determine which computing, analytics, storage, visualization and cloud technologies will solve your most challenging problems.
- Administer local training and support for UT System academic and health institutions.
- Provide the tools to explore, analyze, and visualize clinical and biological data sets.

Resources are available, easy to access, and free.
