The University of Texas Rio Grande Valley offers the nation’s only full program in Medical Spanish for Heritage Learners. Language barriers significantly compromise the quality of healthcare for limited English proficient patients. Recent studies have shown that Spanish-speaking patients have disease, mortality, and pain burdens at least twice as high as English-speaking patients. These facts make language a crucial concern for the improvement of health among Latinos in the U.S. The Medical Spanish program aims to develop critical skill sets that future healthcare providers can use to improve communication with Spanish-speaking patients.

Additionally, the curriculum is designed to raise awareness about language issues that intersect with access to healthcare among Spanish-speaking patients in the U.S. Students in the program participate in a service-learning internship at a local community health center that serves primarily uninsured and limited English proficient patients. These activities are intended to prepare students for the National Board Certification Examination for Medical Interpreters. The program meets the Training Program Standards issued by the National Council on Interpreting in Health Care in 2011.

The School of Music awards the certificate in mariachi performance to students who choose to complete a structured study of mariachi music that includes instrumental/vocal techniques, and historical, stylistic, and pedagogical issues in mariachi music. The certificate will produce highly competent mariachi performers and educators. As mariachi ensembles continue to proliferate in secondary and higher education, the certificate will add value to the degrees of students seeking this concentration. The certificate also fulfills UTRGV’s values as a bi-cultural, bilingual, and biliterate institution, and the mission of the department of music and dance to promote greater appreciation of the cultural heritage of the region. The certificate in mariachi performance is not a substitute for teacher certification.
