The humanities provide insight into the human condition, suffering, personhood, and our responsibility to each other, and offer a broad understanding of wellness, illness, and healthcare through interdisciplinary scholarship and research. In bringing together the visions and analytical approaches from diverse scholars, the UTPA Medical Humanities Minor offers students an interdisciplinary curriculum designed to develop an understanding of the cultural, economic, gender, and historical factors that influence health and healing. At the same time, the program will foster respect for the pluralistic diversity in society at large. For those who are interested in the practice of healthcare, this minor will be invaluable in examining crucial components of the healing arts, including ethical considerations in patient/client-caregiver relations and humanistic elements of positive healthcare delivery, such as effective communication, respect amongst patients/clients and providers, integrity, excellence, compassion, empathy, altruism, and service. By participating in this program of study, students will have the unique opportunity to work with faculty in the humanities who have strong teaching and research interests in the area of healthcare. This minor encourages students to think innovatively about their own roles in improving health throughout the world, no matter their future profession or past background.

The University of Texas-Pan American offers the nation’s only full program in Medical Spanish for Heritage Learners. Language barriers significantly compromise the quality of healthcare for limited English proficient patients. Recent studies have shown that Spanish-speaking patients have disease, mortality, and pain burdens at least twice as high as English-speaking patients. These facts make language a crucial concern for the improvement of health among Latinos in the U.S. The Medical Spanish program aims to develop critical skill sets that future healthcare providers can use to improve communication with Spanish-speaking patients.

Additionally, the curriculum is designed to raise awareness about language issues that intersect with access to healthcare among Spanish-speaking patients in the U.S. Students in the program participate in a service-learning internship at a local community health center that serves primarily uninsured and limited English proficient patients. These activities are intended to prepare students for the National Board Certification Examination for Medical Interpreters. The program meets the Training Program Standards issued by the National Council on Interpreting in Health Care in 2011.

The department of music and dance awards the certificate in mariachi performance to students who choose to complete a structured study of mariachi music that includes instrumental/vocal techniques, and historical, stylistic, and pedagogical issues in mariachi music. The certificate will produce highly competent mariachi performers and educators. As mariachi ensembles continue to proliferate in secondary and higher education, the certificate will add value to the degrees of students seeking this concentration. The certificate also fulfills UTRGV’s values as a bi-cultural, bilingual, and biliterate institution, and the mission of the department of music and dance to promote greater appreciation of the cultural heritage of the region. The certificate in mariachi performance is not a substitute for teacher certification.

STUDENT LEARNING OUTCOMES:
1. Students will have competence in musical performance of a variety of genres and styles in the mariachi repertoire.
2. Students will have an understanding of the historical and cultural contexts of mariachi music
3. Students will have the technical skills to arrange pieces for mariachi ensembles
4. Students will have skills to direct and promote mariachi ensembles
