Symposium for Undergraduate Research Exploration 2019

in UT Austin’s College of Natural Sciences (SURE in CNS)

Are you a junior or senior doing interesting research in biochemistry, microbiology, molecular biology, ecology, physiology, neuroscience, nutrition, family science, or human development? Are you considering graduate school to continue your research training and pursue an advanced degree?

Apply now to attend our symposium November 3–4, 2019 in Austin, Texas. Participants will visit The University of Texas at Austin campus and:

• **Present research** (oral presentations and/or posters) to fellow undergraduate researchers and College of Natural Sciences faculty members and graduate students while competing for awards

• **Tour the labs** of top biologically oriented scientists and meet other leaders in the college

• **Have opportunities to learn about graduate school application processes**, comprehensive financial support for College of Natural Sciences graduate students, and professional development and career services for PhD trainees

• **Receive travel support, food, and lodging**

CNS is committed to preparing leaders in research communities that are becoming increasingly diverse, and we understand that diversity is vital to the future of science. We encourage applications from individuals within populations traditionally underrepresented in our disciplines and are dedicated to ensuring an inclusive, supportive environment where all students thrive.

**Questions?** Contact Dr. Scott Burghart: sburghart@austin.utexas.edu or (512) 232-1074

**APPLY BY SEPTEMBER 3, 2019**
