ABOUT ME

Creator By day, Inventor by night.

Those are the words I live by on a day by day basis. they might not mean anything special to just anyone; but the works and the ideas I spend time on. they always become something to believe in. What I do is what I feel like I should do to benefit not only maybe but the future of many people. even if its the smallest things in my works. My photography, my Words of wisdom or any other term. I do what I can to make the best of every situation.

SKILLS

PROGRAMMING

In terms of programming software's I am quite familiar with C++ Python and Java. In my own spare time I like creating small websites and typically other sites revolving around projects I do at college. I also have worked on linux software!

3D MODELING

I use Blender, Maya, and Unity softwares! They're all unique yet very similar in their own ways. Mainly opt for Maya since the user interface is a lot quicker than the other softwares I have invested time.
