

## Resume Building Workshop in UTRGV Community Hub

In March, Alamo Community Resource Center in partnership with TECHBus hosted a free resume build workshop for high school students. The resume workshop was held during spring break to allow students to attend.

The objective of the workshop was to educate the students on how to focus their skills and develop their career goals.

Hidalgo County Precinct 2 provided the TECHBus to allow internet access for those students unable to access from their homes. As part of working to address the needs of the community, UTRGV and the Alamo Community Resource Center collaborated in hosting the resume workshop and providing internet access for students to not only build their resume, but to also promote the importance of aiming for greater future.
