#### F. IMMUNIZATION /SCREEN HISTORY

Immunization /Screen History	Date Received
Tetanus Immunization/Booster (A tetanus booster is recommended for all adults every 10 years per the Centers for Disease Control's adult immunization schedule. Tdap or Td is offered by to all personnel working with research animals at no cost.	
Hepatitis B vaccination (This vaccine is recommended for all personnel working with human body fluids, tissues or cells or OPIM)	
Rabies (The rabies vaccine is recommended for all personnel identified as working with high risk rabies species such as bats and wild mammals including raccoons, skunks, foxes, and coyotes.	

#### **Special Notice**

Due to occupational job duties, you may be at risk of exposure to potentially infectious materials and/or blood or blood products that may put you at risk for acquiring diseases. Certain accommodations may be required for your safety, including immunizations, use of respirator, special protective equipment or clothing, etc. EHSRM will inform you of any additional requirements.

Female Personnel: If you are pregnant or become pregnant while involved in the animal care and use program, certain precautions may need to be taken during your pregnancy due to the risks associated with animals, biohazardous materials, radiation, or chemical agents. You are encouraged to discuss this with your personal care physician. Female personnel planning a pregnancy or who become pregnant while working with lab animals or in a laboratory setting are NOT required to notify the institution or the EHSRM of this information. However, EHSRM is available to confidentially discuss any reproductive health concerns you have involving your work with lab animals and/or laboratory work.
