Motion to approve both policy updates: Jennifer Welbourne

Second: Marcela Hebbard

Motion passes

Notes: 1st policy revision is due to a large population of 2nd degree students coming back to get a Nursing degree and out of state students. It was not considered that after being admitted to a program that students may need to go to a Community College to take prerequisites. The current policy restricts students from doing that. The word "advanced" was added which states that any advanced coursework must be taken at UTRGV, but any lower-level coursework can be taken at a transfer institution. 2nd Policy – This is a clean-up due to a misalignment. Institutionally, 30 hours has been enforced. This will be updated to align the policies. Both policies will be amended and published.

Notes: Both the Biology and the Chemistry departments merged to create the new School of Integrative Biological and Chemical Sciences. Due to a long history of leadership turnover in the Chemistry department and since the Chair of the Biology department was serving as Interim Chair of the Chemistry department for the last 2 years, Dean Incera saw an opportunity to collaborate and merge the two departments.
