

GETPHIT SUMMER BOOTCAMPS

Gaining Equity in Training for Public Health Informatics and Technology

Bootcamp curriculum will include:

- Introduction to Public Health Informatics (PHI)
- Data Standards
- Public Health Analytics
- Privacy and Security
- Emerging Trends in PHI
- Public Health Surveillance
- Epidemiology
- Bias and Equity in Data Use

Examples of potential projects

- Building a decision-making dashboard for a rural public health department
- Collecting public health data via a variety of methods
- Developing an algorithm to identify specific risk factors

Scan the QR Code to learn more.

What: In-person (2 weeks) and online (8 weeks) summer bootcamps for UTRGV undergraduate students interested in public health informatics.

- Week 1: Informational lectures and hands-on exercises.
- Week 2: Faculty-mentored, small-group research projects.
