Current Research Projects

1. Applying Forensic canines or Human Remains Detection Dogs as a form of remote sensing to identify the presence of human remains in archaeological contexts. Project in conjunction with Dr. Lorna Pierce of the Santa Clara County Medical Examiner's Office and the Institute for Canine Forensics (www.K9FORENSIC.org). Conference symposiums on this topic were held in April 2004, April 2005, and January 2006. An article has been published (see below) and a second manuscript will be submitted for peer review. Its working title is:

Pierce, Lorna C., Eva Cecil, Shirley Hammond, Patricia Lamson, Adela Morris, Bev Peabody, and Russell K. Skowronek

A Potential New Tool For The Archaeologist: Human Remains Detection Dogs in Archaeology.

2. Study of prehistory diet in the south Bay Area using carbon and nitrogen isotope analysis. Project in conjunction with Dr. Laura Cahue, University of South Carolina, Dr. Margaret Graham, University of Texas-Rio Grande Valley, and Dr. Lorna Pierce, San Jose State University. SCU internal grant for analyses in 2000. First report of findings Skowronek and Graham 2004. A second report, Skowronek and Pierce was completed in 2006. A manuscript for a peer-reviewed journal is being completed. It is titled:

Graham, Margaret A., Lorna C. Pierce, Laura Cahue, and Russell K. Skowronek

Prehistoric Dietary Stability and Variation in the South San Francisco Bay Area. California Archaeology.

3. Translation and editing of an account book relating to Mission Santa Clara. A team project with Dr. Patricia Fournier of the Escuela Nacional de Antropología e Historia and her students Tamara Gonzalez Vega, Yuri Valdes Alvarez and Gabriel Francia who transcribed the original documents, and Jelena Radovic and Hugo Morales who translated it.
