Eight International Conference on p-Adic Mathematical Physics and its Applications
p-adics.2021
WEB CONFERENCE
May 17 - 28, 2021

Welcome

The conference will be focused on the interactions between non-Archimedean mathematics, physics, biology, and computation. Among the main topics to be covered are:

- Analysis, dynamical systems and probability over non-Archimedean spaces and their applications
- Models of complex systems and biosystems
- Quantum theory, quantum field theory and string theory in a non-Archimedean setting
- Gravity and cosmology theory in a non-Archimedean setting
- Information theory, cryptography, and bioinformatics.
