

COLLOQUIUM

**Searching for Physics Beyond the
Standard Model**

Cesar Bonilla Díaz
(Universidad Católica del Norte, Chile)

April 5th, 2024 (12:00 – 1:30 pm) via zoom

Abstract: In this talk I will describe what is the framework we have so far to understand fundamental particles and their interactions, the Standard Model of particle physics. I will discuss what are the challenges that this theory faces and some proposals beyond the standard picture which could imply the existence of new physics.
