

# TRESS project goals

## Coursework

Students will master soil science fundamentals from each sub-discipline:

- Genesis and morphology
- Chemistry
- Physics
- Biology
- Conservation

## Experiential Learning

Students will have practical experience in surveying, managing, evaluating, and solving problems related to soil quality and health.

## Careers

Students at UTRGV will successfully seize application opportunities and secure jobs, increasing the proportion of Hispanic professionals in the fields of soil science.
